## **Revision History:**

**DS\_Sinenya.ZIP** (rev 1.0) October 2000 - This was the initial public release of my DS\_Sinenya font for Windows. It was tested with Microsoft Windows 98 running Word 2000. It included the following items:

- 1) Font: 'DS\_Sinenya' (version 1.0) in Microsoft Windows TrueType and ATM (postscript type-1) format.
- 2) Documentation: A 3 page PDF Help file (version 1.0).

*Dan Smith's Note: I built the font so that the vowel signs appear over/under the next consecutive consonent symbol. But when words end with a vowel sound, there is no letter to carry the vowel sign! - so that vowel symbol is left hanging in mid-air. So I can only assume that this alphabet is intended for use with languages where words never end with vowel sounds.*
